Richmar® offers an unparalleled line of electrodes that guarantees quality, durability and performance. With over 65 years of experience in developing electrotherapy machines and accessories, Richmar's® knowledge has led to the creation of these innovative and reputable products.

We incorporate the best technology to develop electrodes in a variety of shapes, sizes and configurations to suit every need. Our products feature unique components such as the proprietary moisture barrier in our e-stim electrodes that tailor to specific treatment needs and ensure safe usage.

Richmar® electrodes are known for their longevity of use and are designed for safe and effective pain relief. You can trust Richmar® to provide the highest quality and most reliable electrodes for everyday use.

# POLY BAG Electrodes

## PRODUCT FEATURES:

- Electrodes that do not sacrifice adhesion and performance
- Gel formulation produces electrodes with maximum dry-out resistance
- Optimum distribution of electrical current throughout the electrode's surface

# FOIL BAG

## Electrodes

Our foil bag electrodes offers a packaging environment that helps maintain more moisture than a traditional poly bag. The foil bag can help preserve the lifetime of the electrode adhesion when properly stored between uses.

# MULTISTIM Electrodes

Incorporating the best in electrode technology, Richmar® combines a proprietary bonding and moisture barrier, that provides each electrode with a high tensile strength, while eliminating delamination between each use.

## PRODUCT FEATURES:

- Multistim stim electrodes are available in cloth or foam, in a variety of shapes and sizes
- Gel formulation produces electrodes with maximum dry-out resistance
- Optimum distribution of electrical current throughout the electrode's surface
- Available for private labeling- ask your rep for more information

# MICROBLOCK

## Antimicrobial Electrodes

MicroBlock antimicrobial electrodes are the first and only electrodes on the market that help kill and inhibit the growth of common bacteria on and around the zone of inhibition of the surface, when being used. These electrodes can play an important part in infection prevention for hospitals and healthcare facilities, making MicroBlock the logical choice to decrease the risk of healthcare associated infections while treating your patients.

### PRODUCT FEATURES:

- Contains the Benzethonium chloride (BEC), a bactericidal agent that kills disease-causing microbes and common antibiotic-resistant threats such as:
  - E. cloacae (CRE)
  - S. aureus (MRSA)
  - E. coli (ESBL)
  - P. aeruginosa and A. baumannii (Multi-Drug Resistant)
- Same comfortable application and delamination resistance as found in Richmar® MultiStim electrodes
